COURSE CODE: **TD866_1**

Nature matters in conversation

<https://www.open.edu/openlearn/nature-environment/nature-matters-conversation/content-section-0>

Course summary

This free course, Nature matters in conversation, focuses on the substance of environmental responsibility-what matters. The question 'What should constitute our prime focus of attention' can prompt different responses. We consider two points of contrast in differing focuses on what matters: 1 a distinction between nature and the environment 2 a distinction between nature/environment and related human interactions

Learning outcomes

By completing this course, the learner should be able to:

- appreciate different connotations and traditions of the terms 'nature' and 'environment' in the context of environmental responsibility
- use conversation as a core metaphor for describing 'what matters' in environmental responsibility
- identify and compare formal and less formal expressions of environmental responsibility.

Completed study

The learner has completed the following:

Section 1

Environment: the challenges of what matters

Section 2

Conversation: a metaphor for what matters
