

Calculating the Mean

✓ ✓ ✓ ✓ ✓ ✓
20, 16, 13, 23, 27, 30

$$\text{mean value} = \frac{\text{sum of values}}{\text{number of values}}$$

$$= \frac{20 + 16 + 13 + 23 + 27 + 30}{6}$$

$$= \frac{129}{6}$$

$$= \underline{21.5}$$

So the mean value for this data set is 21.5
