Succeed with Maths – Part 1

SPEAKER:

Everyday calculations and measurements can be tricky, especially if you are lacking confidence with maths. Succeed with Maths - Part 1 from The Open University helps give you that confidence, and gradually builds your math skills. This course will improve your confidence to use maths in daily situations, and also give you a greater understanding of mathematical theory and shortcuts to finding solutions.

You'll develop essential skills, like using a calculator, how to interpret and solve problems, good maths communication. You'll tackle questions, such as, how can maths help me with money? How do I deal with percentages and fractions? How can I use negative numbers in calculations?

When you successfully complete the course, you'll receive a digital badge, and can move on to Succeed with Maths - Part 2. Completing the course will provide you with the knowledge and confidence to succeed with maths and move on to the next step in your future.
