

## TV

Imagine the full word that has TV as its abbreviation. It has ten letters. DON'T WRITE IT DOWN.

- How many of the letters are made from curved lines?
- What word is made from the third, the sixth, the ninth and the tenth letters?
- Which letters appear more than once and what are their positions?
- Which letter is as far from the front of the word as the letter S is from the end?

Imagine the letters written in two rows of five to form a rectangle.

- Which letter is directly below the L?
- Which letter is diagonally opposite the S?
