

Introduction to OpenLearn

OpenLearn for OU students

Narrator:

OpenLearn can be used for free by anybody... But it's particularly useful for Open University Students.

Using your OU student username and password to log in, you can research your potential OU course or module before signing up, complete your student induction, or learn skills like note taking, revision techniques, essay writing or using online forums, that could all be useful for your studies.

All the content on Open Learn is written and reviewed by Open University academics - so you might even use OpenLearn as part of your OU module. Whatever you're studying, OpenLearn is also useful for acquiring valuable skills that will help you stand out to potential employers.

Any digital badges earned on OpenLearn are visible on your OU student record, they can be included on your CV and can even be shared on social networking sites.

In fact, we've seen that students who use OpenLearn tend to be more successful in their OU studies.

So, whether you're already committed to an OU qualification, wanting to improve your employment prospects, or interested in gaining new skills in between modules, OpenLearn is for you.
