Course summary

Please note: This course is closing soon and will be removed from OpenLearn on 20 June 2024. Please make sure you have finished studying the course by then. Why is the way something looks important? Text, colour, images, moving images and sound all interact to produce a user-friendly environment within a user interface. This free course, Designing the user interface, will help you understand the effect each software component has on the user and explain how a consistent and thoughtful application of these components can have a significant impact on the look of the final product.

Learning outcomes

By completing this course, the learner should be able to:

- After studying this course, you should be able to:
- design a user interface, making effective use of typeface, colour, still and moving images, and sound.

Completed study

The learner has completed the following:
