

School Leadership: The learning environment

English

When I go to the classroom, the teachers and the children appreciate that their principal is among them and is overseeing their work.

The children are happy and the teachers are also pleased that whatever they are teaching in the class, the principal is observing.

There is curiosity among the children. And there is a good atmosphere between the teacher and the children.

The children are happy to learn.

One child recites something and the other children repeat it.

Those who are new to the material try to learn it and everybody is learning well.

Since I have been in this school, I have prioritised the cleanliness of the school and punctuality. The teachers always cooperate with me and promptly come to my assistance.

Since I started here, the school has opened on time.

The children arrive on time. Every session starts on time.

The school is clean and all the classes run on time.

All the children and the teachers attend their classes on time.

Although we have had some challenges, I have not noticed any major difficulties.

I have worked with the teachers and the parents. With their cooperation I am doing my job with everyone's support.
