

Challenge	Starting out	Resources	Action	Evaluation	Extra Qs
What challenges are the community facing in relation to the issue you have identified?	Vision - what do you want to achieve from the implementation of the community owned solution?	What is needed to achieve your vision?	How will you go about achieving the vision?	What is the current situation? What difference will your actions make to your community? How are you going to know whether your vision has been achieved?	Are there any other projects/initiatives in community working on the challenge? Could there be any negative consequences of this project? How would you maintain the positive outcomes of the project after the it finishes?
