

DAFNE privacy policy

The central DAFNE team (CDT) worked in partnership with The Open University (OU) to develop the DAFNE 'portfolio' of online units and resources held on Open Learn Create (OLC).

The CDT provides individuals with access to appropriate training units and resources, including the revalidation unit, on OLC.

The CDT receives information from OLC to enable the CDT to manage an individual's progress through enrolled courses, including progress through course units, quizzes and any grades individuals achieve. All data received by the CDT is held in an individual training record on CDT systems and processed in accordance with the terms set out in table 2, Schedule 8 of the DAFNE consortium agreement.
