## Creation Tools

Creation tools help you create, edit and share different types of content. The different applications described here help you create presentations, visualise mathematical data, video, screencasts, record and share audio, curate images.

Be aware that all sites with video capabilities might contain some pornographic material. If you wish to avoid that content, you can set limits on your searches or choose not to use a particular service. Different services provide different ways of limiting searches.

Name	Description
Prezi	<p><b>What:</b> A visual storytelling tool, allows you to create appealing presentations with integrated media. The free version requires you to store all prezis you create on the site under a CC-BY-SA licence.</p> <p><b>Great for:</b> Creating a rolling presentation to advertise your company products on your Facebook page.</p>
Canva	<p><b>What:</b> Free graphic-design tool website. It has an easy to use drag-and-drop interface and provides access to over a million photographs, graphics, and fonts.</p> <p><b>Great for:</b> Photo editing, designing a variety of documents.</p>
Pinterest	<p><b>What:</b> Visual bookmarking tool and photo sharing site; users create virtual pin boards with photos and videos and then share them on their pin boards via other social media tools.</p> <p><b>Great for:</b> Sharing creative project ideas with colleagues, or collecting decorating ideas for a kitchen refurbishment.</p>
Instagram	<p><b>What:</b> Online photo creation and editing service that is really all about the sharing. Short videos may also be recorded and shared.</p> <p><b>Great for:</b> Sharing food pictures with tags for the different techniques and ingredients</p>
Jing	<p><b>What:</b> Captures basic video from computer screen, animation and still images, then shares them online.</p> <p><b>Great for:</b> Sending an example video of computer glitches to an IT helpdesk.</p>
CamStudio	<p><b>What:</b> Open source video screen casting software that allows you to record what displays on your computer screen, with a voice over, or screen captions, or in-picture video of yourself in webcam mode.</p> <p><b>Great for:</b> Creating a simple training video of new software to share with colleagues.</p>
Tumblr	<p><b>What:</b> Microblogging site that is run from a user's dashboard. Tumblr posts can be queued for timed release and tagged to help people find relevant content. Has been criticised for dark and sometimes pornographic content.</p> <p><b>Great for:</b> Blogging your own reviews of favourite films to share with friends and tumblr followers.</p>
Tableau Public	<p><b>What:</b> Free data visualisation tool that works on Windows and Mac. Create and share interactive charts and graphs, maps and live dashboards.</p>
