

## Creation tools

Creation tools help you create, edit and share different types of content. The different applications described here help you create presentations, visualise mathematical data, video, screencasts, record and share audio, curate images.

Be aware that all sites with video capabilities might contain some pornographic material. If you wish to avoid that content, you can set limits on your searches or choose not to use a particular service. Different services provide different ways of limiting searches.

Icon and Name	Description
 <b>Prezi</b>	<p><b>What:</b> A visual storytelling tool, allows you to create appealing presentations with integrated media.
