

Welcome to the OPENLang MOOC, a 4 weeks' Massive Open Online Course produced in the framework of the OPENLang Network European project. The OPENLang MOOC aims at the creation, the sharing and the use of multilingual and interactive Language Open Educational Resources. This MOOC is addressed to language teachers and to European Language Teaching professional communities.

Three reasons why you should join this MOOC:

It is innovative: although there are many language MOOCs, there is not any MOOC – based on collaborative learning – aiming at creating, sharing and using multilingual and interactive Language open educational resources.

It has a strong transferability potential: the MOOC could be used by any other stakeholder (language teacher, universities, schools, educational organizations, businesses companies, etc.) interested in adopting such an innovative tool to implement language skills.

It is extraordinary impactful, as participants will use this language MOOC to learn how to create/use/reuse open educational resources in their teaching practices, possibly adopting this MOOC into their educational practices. In addition, the OPENLang MOOC promotes openness, multilingualism, collaboration, and quality.

So, what are you waiting for? Join us and let's learn together!
