

Open Up Your Classroom with OER

Traditional language textbooks are limiting. With no way to customize them, teachers can feel stuck. We're here to tell you about Open Educational Resources.

An OER is any material shared by its creator that has a Creative Commons or other open license and is available at low to no cost. While traditional textbooks have a copyright preventing you from making copies or modifications, OERs allow you to remix, revise, and reuse materials—creatively adapting your resources and sharing them with language teachers and classrooms all over the world.

Come explore this new pedagogical landscape and open up your resources and your classroom.
